MOBILITY AND ACCESS

2.1 The percentage of total miles of bike and pedestrian facilities to total street miles within the City.

Miles of Facilities	2003	2005	2007	2008	2009
Bicycle	11.4		14.47	14.47	14.47
Pedestrian	124.4		133	147.08	147.08
Roadway	178		*178	166	166

	2003	2005	2007	2008	2009
Percentage of Bike and Pedestrian to Street Miles	76%		82%	97%	97%

* The length of roadway represented in 2003 & 2007 was obtained through a different methodology and was incorrect. The length of roadway for 2008 and 2009 was obtained through methodology that is more precise.

The documentation for the QOLI (pg 16) states that sidewalks and bike lanes are only measured once, although they may be on both sides of the roadway. The GIS department has always measured both sides of a roadway for sidewalks and bike lanes. The city's entire roadway length is 166 mi. with alleys and 166.02 without alleys. The roadway length without alleys will be used. There has been no change in roadway length between 2008 and 2009.

2.2 Tri-Met bus ridership in Lake Oswego.

Note: The counts represent the number of passengers getting “on” and “off” the bus in Lake Oswego.

YEAR	ON	OFF	TOTAL	# of Stops
2000	1,117	1,482	2,164	215
2001	1,036	1,099	2,135	215
2002	1,033	1,087	2,120	215
2003	1,029	1,074	2,103	225
2004	955	1,009	1,964	225
2005	898	951	1,849	225
2006	697	774	1,471	225
2007	1,117	1,046	2,163	224
2008	1,524	1,769	3,293	225
2009	1,290	1,334	2,619	224

2.3 Percentage of street miles providing transit service, to the total miles of streets in Lake Oswego.

Note: This data will be provided after discrepancies between the 2004 and 2007 base data for street miles are resolved.

Miles of facilities	2003	2005	2007	2008	2009
Bicycle	11.4		14.47	14.47	14.47
Pedestrian	124.4		133	147.08	147.08
Roadway	178		178	166*	166*
Transit			45	45	45
	2003	2005	2007	2008	2009
Percentage of Transit Miles to Street Miles			25%	27%	27%

The ratio of transit miles to street miles increased artificially due to the revised (decreased) measurement in roadway length.

2.4 Pavement Condition Index (PCI) for major roadways in the City.

Note: PCI surveys are typically conducted every three years. The next survey is scheduled for 2009. PCI values: 0-30 Failing; 31-50 Poor; 51-70 Moderate; and 71-100 Good.

2.5 The volume of traffic on major roadways in the City.

Note: Traffic counts for these roadways (mostly arterials, some come collectors) include counts in both directions. The 2003 data was not included in this update because the high volumes recorded in the data seemed to indicate an error in recording or methodology.

ENVIRONMENT AND NATURAL RESOURCES

5.1 The percentage of impervious surfaces in the City's Urban Services Boundary.

Note: 2003 was the first year the data was collected. In 2003, 32% of land within the Urban Services Boundary was impervious. Due to staff resources, no time has been allocated to obtaining this information. Staff is also looking at less intensive ways to obtain this information.

5.2 The Air Quality Index for the Portland Metro area.

Note: There are only 273 recorded air quality index days for 2007 because fourth quarter data has not yet been validated.

5.3 Stream health index for select perennial streams.

Note: Scores are based on the DEQ Multimetric Index ranging from 10 to 50 that measures the activity of the macro invertebrate community in streams. The lower the score, the worse the stream health. David Gilby stated "This is a Macroinvertebrate IBI (index of Biotic Integrity)...not a Stream Health index. The values listed in those tables are the only ones available at this time.

5.4 Oswego Lake water quality as measured by Carlson's Trophic State Index.

Note: The cloudiness of lake water is often related to the amount of nutrients in the water. The more the nutrients, the more the plants and animals and the cloudier the water. The index measures the degree of cloudiness ranging from 0 to 100. Values less than 40 indicate low productivity of plants and animals resulting in clear water with oxygen in the entire water column throughout the year. Requests to the Lake Corporation have been made every year since 2004 to obtain this data. These requests have been unsuccessful.
